**Line 30– Monobloc  
Capsule Spinner/Labeler  
Exclusive for the North American Market**

**Technical Details**

**Output: Approx 2500 bott/hour (42 bpm)**

**Machine consists of:**

**Capsule Spinner ( 3 heads)**

**Manufactured by Nortan**

**Pressure sensitive labeller (one or two stations)**

**Can also be supplied with a heat shrinker**

**The station's front and back label are equipped with a step by step motor which assures labelling precision**

**Gear transmission and timing belt**

**All the stations are equipped with paper driving roller with quick release**

**The bottle blocking and rotating system is constituted by a strong aluminium structure and is equipped with two vulcanized rubber rollers pneumatically operated**

**Containers' setup through screw feeder with variable speed**

**The machine is provided with an emergency stop system in case of container overturning on the conveyor belt, paper tape breaking, exhausted reel and overtaking of the rotating couple in the labelling position**

**Possibility to affix wrap around labels with a maximum extension of 350 mm**

**Suitable for all cylindrical sizes between Ø 60 and Ø 120**

**Inverter for electronic adjustment of the speed with a potentiometer**

**The machine is controlled by dedicated electronics. The hardware (processor board/CPU and sleeve cards) and the software (programs) have been designed specifically for the functions that need to be controlled in the machine**

**The machine running through a dedicated board guarantees the maximum reliability, versatility and usage speed**

**Stations adjustable in height from the bottom of the bottle (min. 15mm./ max.35-mm.)**

**Turret complete with 3 spinners for application of Polylam / tin capsules**

**Error tolerance in the label application: +/- 1.5 mm. (with cylindrical containers)**

**Maximum paper passage 190 mm ( 7.4")**

**Power supply: 220 V, three phase**
