# Product Feature

## Wax Dipping Solutions

### Top Benefits to Wax Dipping Solutions

1. Creates a moisture barrier
2. Maintains quality and composure over time
3. Provides a durable seal
4. Easily removable
5. Large assortment of colours for customization

As a business, how can you **elevate** your products to stand out from the competition? Criveller offers waxing solutions to upgrade the look of your bottles, while adding a personal touch to your product.

A wax seal can help to prevent air, moisture, and bacteria from entering the product while it is being stored. The seal can also protect the cork from deteriorating over time.

Criveller offers manual, semi-automatic and automatic waxing machine solutions. With ease and simplicity, the wax machines will allow for a steady production.
