BELT PRESS

TP SERIES

APPLE PRESSING

BELT PRESSING

The belt press is designed for pressing fruit mass. Fruit is placed on the belt which presses it against the cylinders. The extracted juice flows in the collection trays under the press.

Main Features:

- Entirely made of stainless steel
- Mounted on pivoting wheels
- Automatic functioning press
- Level switch in the dumping hopper and collection tray
- Easy to clean unit with pneumatic lifting of the scrapers for easier access
